

Dear Member

Harvey Nash has been retained by Hamad Medical Corporation (HMC) in Qatar to undertake a global search for key international appointments, including the Chair of Dermatology.

HMC are the premier not for profit care provider in Qatar and has developed highly specialised medical facilities capable of providing state of the art preventive, primary, secondary and tertiary healthcare provision. In addition HMC is developing a world class Academic Health System and investing significantly in Research and Development.

HMC has a well-established Dermatology department with a clear vision to become the leading Dermatology Centre in the Gulf area through the introduction of new services and improvements of existing provision and so at the appointment of a Chair who would also oversee the venereology Department is key to its development and success.

The Chair will provide strong clinical and academic leadership and will not only lead the department but will have a significant role across HMC including developing relationships with Weill Cornell Medical College and national leadership issues relating to clinical dermatology across Qatar.

With kind regards

Tom

Thomas Patterson
